

EyeCSite[®] 2.0

Quantitative Optical Gas Imaging (QOGI) Software

OPGAL²

EyeCSite is the industry-leading quantification software, offering a wide range of functionalities that detects, alerts and quantifies emissions in a very simplified and user-friendly interface, without the need for a close contact analyzer.

Ruggedized Tablet			X

QUANTIFICATION

Calibrated accurately to quantify emissions from a safe distance - in leak rate (e.g. gr/hr) and max concentration (e.g. ppm) values.

REAL TIME & POST ANALYSIS

Quantify emissions in real time on site or later on by uploading the videos from the EyeCGas 2.0

LOGS & REPORTING

Easily create a report at the end of each inspection with a built-in reporting template.

MULTIPLE COMPOUNDS

Select from a list of multiple compounds for more accurate quantification reading.

WIRELESS CONNECTION

Wirelessly connects to the EyeCGas 2.0 - enabling quick on the field operation.

USER FRIENDLY INTERFACE

Easy to operate software adapted to the inspection workflow.

COLORIZATION

Real time colorization of the gas plume enables easy detection.

SAFE & RUGGED TABLET

Strong, portable, powerful and fully certified for hazardous locations.
